Make every day more efficient.

FROST & SULLIVAN

2016 BEST PRACTICES AWARD

GLOBAL VIDEO CONFERENCING TECHNOLOGY INNOVATION AWARD

Pexip® Infinity is an award-winning meeting and collaboration platform that enables visual communications and collaboration **with your team's choice of tools and devices**.
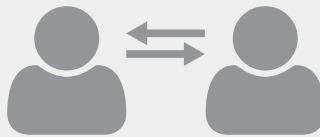

Pexip Infinity solves fundamental enterprise communications challenges. It enables organizations to improve collaboration efforts, move faster, and be more efficient in everyday work. **And make better decisions faster**.

Pexip Infinity seamlessly combines enterprise communications and collaboration solutions in Virtual Meeting Rooms, or operates as a gateway between platforms. It allows people to use any communication or collaboration device or tool of their choice: traditional videoconferencing, Microsoft® Skype® for Business, personal and mobile devices, telephones, or simply any web browser.

Meet
Meet colleagues, partners, and customers face to face whenever, wherever.

Collaborate
Enable your team to collaborate across technology barriers and silos.

Produce
Empower your organization to stay ahead of the competition as you produce better results faster.

Key features:

- Virtualized, scalable meeting and collaboration platform
- Award-winning interoperability for videoconferencing, Microsoft® Skype® for Business, WebRTC, audio, and more.
- Native VMR scheduling for Microsoft® Exchange, Office 365
- Provides everyone in any size organization with enterprise quality video, audio, and content conferencing
- Pexip Fusion technology guarantees native user experience for mixed meetings with VC and Microsoft® Skype® for Business
- Enterprise-wide branding capabilities included

- Runs in your local datacenter, or in a public, private, or hybrid cloud environment. Automated burst-to-cloud capability.
- Microsoft® Azure® and Amazon Web Services cloud deployment options. HPE Helion cloud certified
- SIP, H.323, and Infinity Connect client registration and call control
- One single license for all platform functionality
- Industry-leading reliability and resilience
- Simple to deploy, manage, and use

About Pexip

At Pexip, we believe that we can make people's everyday work more efficient, more productive, and more social.

Our company was founded on the idea that we can greatly improve the way you work and collaborate with colleagues, customers, partners, and vendors.

Research demonstrates that visual communication is more efficient than verbal, so why shouldn't everyone in an organization benefit from being able to use that, just as they have email addresses and telephones?

This is why we have developed Pexip Infinity, and continue to enhance it every day we go to work.

Quick specifications for Pexip Infinity 15

Concept	Virtualized, distributed, scalable media platform for on-premises and cloud
Video codecs	H.261, H.263, H.264, RTV, VP8, VP9, RDP
Audio codecs	G711, 722, 729, Siren/14, Opus, AAC-Lx, Speex, Silk, and more

About VMRs

Just like a physical meeting room —a place where you meet, debate, present, collaborate and make decisions. Faster, better, and more intuitive from wherever you are.

Virtualized

Deploys like any enterprise software on all popular hypervisors, including ESXi, Hyper-V, Xen, KVM, Azure, AWS and others.

Distributed

Deploy as much capacity as you need. Anywhere in the world, and from a single management interface. Benefit from a single, unified infrastructure and save on bandwidth usage.

Powering the cloud

Want Infinity in the cloud? The majority of cloud VCaaS providers run Pexip. You can deploy to private, public or hybrid cloud. Or keep it entirely on-premises.
